It is easy. Sit back in comfort and take your time. Faithful pictures, honest descriptions, exact specifications all tell MORE about a plant than looking at it does. Order as soon as you wish, we ship at proper planting time. Our liberal guarantee and eighty-year reputation make it safe to order this way. Most large wholesale ordering is by mail.

It is fun, since new and rare varieties are far sooner available from catalogs than in local sales yards. Our enormous selection offers hundreds of kinds more than local nurseries can. You get better varieties that are more exciting too.

It is the best way to plan properly. No sales talk, but real information on shade, acidity, moisture, etc. Mark out at leisure where each plant you want grows best in your garden conditions. Result, better growth and far less work.

It is economical. Unlike most other nurseries, however, stock is not shipped from the wholesale growers to a central packing plant or display center. It is shipped direct from growing fields to YOU. Therefore (1) our stock is usually fresher; (2) costs average less.

We have thousands of satisfied customers, and more every year. Many write enthusiastic letters. But, if anything goes wrong, we try to be more than fair. We will never be perfect in this world, but we do try hard to furnish only good stock.

#### **OUR GUARANTEE**

We will allow a credit of 50% of the catalog value of any stock that dies the first year. Credit to be used on future orders as you wish.

We also guarantee 100% safe, satisfactory arrival—but you must report trouble within 10 days.

#### TERMS OF SALE

PRICES — Net at the nursery. Transportation to be added at actual cost. Usually 5 sold at rate per 10, 50 at 100 rate.

PACKING COSTS — Free if Cash accompanies order, except stock dug with a ball of earth. Otherwise, packing is charged at cost (usually 10% of cost of stock). Balled, heavy evergreens: we will estimate costs in advance if you wish.

LIMITED RESPONSIBILITY — We disclaim responsibility for any reason in a mounts greater than invoiced.

CLAIMS for errors, shortages or other causes must be made within 10 days.

#### **FERTO - POTS**

Ferto-Pots are manufactured from a rich rotted cow manure mixture in automatic pot machines and then kiln dried. The pots soften up only in moist soil after planting out after seedlings are big enough. Start your seeds, seedling plants, cuttings, bulbs, etc., in Ferto-Pots and insure quicker, better results; no wilt, no setback in transplanting. Pot goes into the ground without disturbance or shock to the root system and continues to feed the growing plant.

(Postpaid)—2-in. diameter, 100 for \$3.00;  $2\frac{1}{2}$ -in. diameter, 100 for \$3.50; 3-in. diameter, 100 for \$4.00.

### How to Order

Fill in the order form and enclose check. Shipment is made with express charges collected on arrival. You will get a prompt acknowledgement indicating approximate shipping time.

#### ORDER NOW -DON'T WAIT

Unlike other things you buy, nursery stock must be ordered in advance— Why? Because our whole year's shipments come in a few months' time and there is never enough help. Shipments are scheduled long in advance. Order now, we will ship at proper time later.

IN THIS SHORT GUIDE it is taken for granted that most trees and shrubs require normal food, air and water. Thus a plant needing more air than usual at its roots is marked "loose soil" or "drain". Plants very easy to grow are referred to as "tolerant" or may have no notes whatsoever.

#### Light - "sun", "shade".

Light makes the chlorophyl factory turn its wheels. All plants need some. Those that get along best on little light are marked "shade" in this Guide. Those that need a great deal are marked "sun".— Normal plants are not marked.

#### Air — "loose", "heavy", "drain".

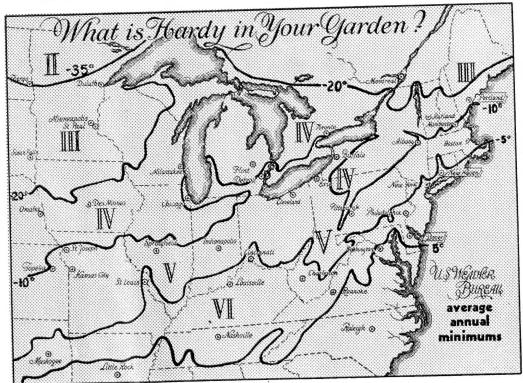

Roots get oxygen from air that filters into the earth. Some plants need more than others; these must have loose soil and will suffocate in heavy damp clays. Such plants are marked "drain".

#### Water - "damp", "dry".

Roots can only use chemicals that are dissolved in water. Also, water is the means of transportation up the stem. Some plants need more than others and die in severe drought. In the descriptions such are marked "damp". A loose soil quickly dries, a heavy soil keeps damp. Thus water and air for the roots are both present in a mixed soil.

#### Food - "humus", "rich", "barren".

- a. Potassium-most soils have plenty.
- b. Phosphorus—needs to be added in most soils with fertilizer.
- c. Nitrogen—Fertilizer supplies it, but water quickly leaches it out, so permanent plants depend on bacteria in the soil. These bacteria depend on:-1. Acidity of soil (lime, etc.); 2. Drainage of soil (air);
- 3. Humus in the soil (food).

I received orders from seven nurseries this spring and your order came through the nicest of all. Thank you for the fine packing.

Mrs. H. D. S., Topeka, Kans.

The crate of myrtle was really a pleasure to open and examine. It really surpassed anything in neatness and freshness that I have received. I most gladly shall recommend you to my friends.

M. M. T., Brooklyn, N. Y.

The taxus capitata were received on time. I certainly appreciate the quality. I wrote M---- for reference and their assurance of your reliability and quality of stock was more than borne out by the trees I received.

H. R. B., Indianapolis, Ind.

#### CLIMATE MAP

The numbers I to VII in the map refer to Zone numbers printed after each plant name throughout this Guide. It shows the northern limit beyond which any given plant cannot grow. This is not a perfect rule. Two modifications might be mentioned. East of Indianapolis, a damper climate makes all evergreens hardier. West of Indianapolis hot western summers make deciduous trees hardier than rated in this Guide. If the Zone is in brackets (IV), plant needs protected site to be hardy

Mrs. V. and I wish to tell you how efficient and fair you are, in treating customers. Ever since 1943 our dealings have been most satisfactory.

A. W. V., Philadelphia, Pa.

#### Symbols: GRADES OF NURSERY STOCK

Indicates a small plant not yet shapely. (No mark at all before the size indicates fairly shapely landscape grade.)

S

Seedlings (or cuttings) not yet transplanted. Plant 3 in. apart in beds, for evergreen kinds, which need shade for two years when they are "X" grade below. Deciduous trees and shrubs are quicker growing and need less care, but should be cut back upon planting.

X

Transplants. Bushier roots and tops. Space 5 or 6 inches apart in beds for evergreens, and shade the first summer. In planting evergreens be careful to keep package moist, remove only one plant at a time to set in the ground, otherwise roots dry out. In two years they are "XX" grade below. Deciduous trees and shrubs are much hardier and need no special care as transplants, except in pruning.

XX

Twice transplanted stock. Much bushier in roots and tops. In deciduous trees and shrubs, "XX" grades are specimens. In evergreens, which grow much more slowly, space 8 to 10 inches apart at least, and no shade is needed. But plant otherwise as for transplants. These are the largest evergreens that can be shipped with little expense, perhaps 10 to 15% extra for express.

POT

Any of the above can be grown in pots, and thus handled with a pot ball almost any time of year. Just dig a hole to fit, press earth around on all sides, soak. Space twice the size of the pot at least (2 inch pots space 4 inches, etc.). Very small pots need shade first year, larger sizes not. Much safer than bare root stock, but much costlier for express. Perhaps 30%. (2-inch pots, handle like "X" grades; 4-inch pots like "XX" grades.)

Plant-bands can be used instead of pots. Treat the same way. See page 36 for special offers.

BB

Balled and burlapped landscape specimens. Usually only evergreens are balled. Deciduous shrubs and trees are handled bare root in specimen sizes, the only special care is to watch they are not planted deeper than they stood in the nursery. (Check soil mark in lower stem.) B&B stock costs are high for express—50% of cost of stock or more. Bare root deciduous trees and shrubs cost 20% or less for specimens by express.

COLL-

A few kinds of natives (mostly rhododendrons) can be safely brought direct from the native field to your garden. Described and priced on page 16.

On the following pages are arranged alphabetically the really choice, showy Evergreen Shrubs. No plants in gardens are easier to care for, once planted on suitable sites. Their very name tells the treatment: Broad evergreen leaves transpire water constantly so extra moisture is needed when planting and all year. Mulching with peat helps conserve soil moisture. All easy to grow—Acid-soil kinds, however, must have acid soil.

Abelia grandiflora.

### Rhododendron-culture

- 1. Culture: acid. damp loose soil.
- 2. The roots feed at the surface—do not hoe or rake. Plant them properly and thereafter water and mulch as needed.
- 3. Light shade, airy and open, gives best results. Only certain trees will do. The best are Oaks, Cherries, Magnolias and Birch. Their leaves make the best mulch. Avoid Beech and Maple.

#### Young Grafted Hybrid Rhododendrons

2-year old, 10 to 12 inch Sice, sturdy, healthy plants 5 or more @ \$3.25 each 25 or more @ \$2.60 each

Minimum shipment on these is a box of 5 plants for \$16.25 (\$3.25 each) but order as many as you wish, in good supply. These are Holland-grown, but spent a whole season growing here, so are acclimatized and ship and grow without trouble. No lower price can be found for quality stock. ROSE—Catawbiense Boursault, roseum elegans.

REDS—America, Chas. Bagley.

PURPLE—Purpureum elegans.

### **Hybrid Rhododendrons**

#### NAMED VARIETIES ON OWN ROOTS

Own-root plants grow shapelier than grafts, and are longer lived, with less care and pruning. Also hardier. The following are from open field, dug with ball of earth. They have been pinched to make low, shapely branching. All hardy Zone VI, some extra hardy ones as noted in Zone V. Finest quality stock.

#### (Sizes) (Named varieties)

- B Caractacus—compact, purple-red. Zone V.
- BC Dr. Rutgers—fiery red, compact. Zone V.
- BC Ignatius Sargent—rose-red, vigorous. Zone V.
  - C Michael Waterer—bright scarlet. Zone V.
  - A Rosa Mundi—vigorous pale pink. Zone V.
  - C Roseum Elegans—lilac rose, compact. Zone V.
- C Mrs. C. S. Sargent—rosy red. Zone V.
- BC E. S. Rand-dwarf, compact red.
  - A Mrs. P. Den Ouden-fine crimson.
- AB America-neat growth, good red.
- BC Lee's Dark Purple—dark, rich color.
  - A Mme. de Bruin-striking scarlet.
  - C English Roseum—pinker Roseum Elegans.
  - D Roseum Superbum-good pink, good bush.

### NATIVE Aristocrats

The five flowering evergreen shrubs on this page are shipped from the mountains of North Carolina. Cold winters there make them hardy. They are dug from natural growth in the open (not in woods) hence will succeed in normal garden conditions. Great care in digging, handling and packing has resulted in outstanding success in our customers' gardens:—about as good results as from plants cultivated in nursery rows for these kinds. Never fertilize, nor cultivate. Plant in acid peaty soil, mulch with dead leaves, prune as you may wish, then leave them alone.

## Rhododendrons low as $39\frac{1}{2}$ c, in few years, little care, will be bushy \$10 specimens.

SIZE 1: Small as Ships Safely
12-inch Seedlings (1 Stem) with a Small Ball.

This special "Young Aristocrat" grade measures about 12 inches dug with a little earth left on roots, but not burlapped. Plants weigh about one pound only. This stock is not to be compared for a minute with ordinary collected plants. It is on the contrary all carefully dug, the greatest pains being taken to preserve the roots. Carefully packed, it is easily planted and makes a quick start. Shipped from North Carolina, express runs only 8c each (in 100 lots).

Sold only in boxes of 4 (assorted as you wish) 4 for \$22.50. (Express about \$5 for the box of 4.)

Fruit trees and shrubs are planted like any other deciduous tree. (p. 49.) Most need some care, but those most labor-saving include: Crabapples, Bush-cherry, Blueberry, Blackberry, nut trees and (in regular fruit) the dwarfed forms rather than the standard trees. An orchard so planted can be less than half as much work and expense.

#### **SELF-STERILE FRUITS**

Many fruits do not bear good crops if planted separately. Pollen from nearby trees of different variety is often needed. Noted on these pages by:

self-unfruitful. Do not plant by itself, but with another variety of the same fruit.
(P)—Good pollenizer.

### **Huge Hybrid Blueberries**

Really beautiful as specimens or in hedges. Suited for use in small quantities in the small garden. A 100-foot hedge will pay about \$25 worth of berries a year! (Spaced 18 ins.)

#### Why Wait? Plant Some NOW!

And enjoy the berries sooner. Not only will add to your garden but pay back cost many times over! Hardy throughout U.S.A.

Weymouth. Earliest of all. Best for cooking.
Concord. Midseason. Upright. Fine quality.
Stanley. Early July. Tall. Large berries.

Set the plants in beds 4 feet apart. Several varieties should be included in planting, as an exchange of pollen is necessary to produce

good crops of berries. Or order "mixed" if you wish. All varieties are almost equally fine.

Blueberries require an acid soil containing peat or other rotted vegetable matter They need a moderate supply of soil-moisture.

### **NUT TREES**

There are good nuts to be grown in the north. Chestnuts from seed are young, heavy bearers. The grafted Walnuts are hardier and also bear heavily and young. The first two years mulch well with hay or straw. Water if drought comes. Do not plant deeper than they were in nursery.

#### BLACK WALNUTS-Zone IV

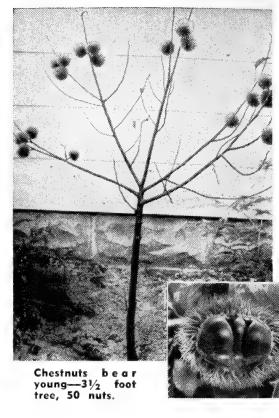

One of our most beautiful native trees, growing well in any fertile well drained soil. The grafted sorts bear their first nuts commonly in the third to fifth year. Thomas is a rapid-growing tree. The meat is attractive and tasty, falls out easily in halves.

The European Grape (Vitis vinifera) is far superior to our native grapes.\* However, it has not the stamina to withstand sub-zero weather and succumbs to disease, while our hardy native grapes remain immune. These hybrids combine American health with European flavors.

#### STURDY, WELL ROOTED VINES—Zone V. 2 Year No. 1 \$2.75 each postpaid

**BACCO No. 1**—Fine strong growing plant, excellent for trellises, dark red, medium size berries, good wine and table grape.

WESTCHESTER—Rosy white, long clusters, very sweet, finest for table and wine, very abundant bearer, free of foxiness

MADELEINE—White Muscat, big berries, long clusters, finest of table grapes.

SEIBEL No. 5860—Good table and wine grape, white, good all round qualities.

### **5 POPULAR HYBRIDS**

2 year olds \$2.00 each, 3 \$4.50

#### INTERLAKEN SEEDLESS

New hybrid seedless hardy in Zone IV. Very sweet, meaty and crisp. Amber color, tangy flavor. Ripens early (Sept. 1st).

#### ROMULUS SEEDLESS

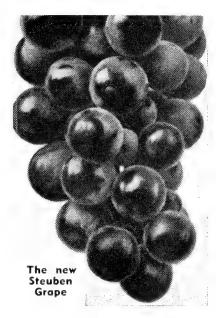

New American-European hybrid to Zone IV. Mid-Sept. Yellow, sweet, meaty. Fine seedless variety.

### Hybrid Grapes

High quality grapes on far less vigorous (and less troublesome) vines.

No permanent canes needed; only a short trunk or shank. Grapes grow on new wood, which is pruned away each year.

Grape Culture calls for plenty of humus in the soil. Old manure is far the best form, to produce vigorous spring growth. Extra moisture is needed as fruits fatten in summer. Otherwise grapes may be small, dry.

#### STEUBEN (Blue-Black)

Exquisite flavor. Huge, long slender clusters. (Zone IV). Absolutely free from rot and mildew.

#### SEIBEL No. 9110

Yellow table grape of unusually fine dessert quality. Bears young.

### **Dwarfed Fruits**

Available in All Varieties on Opposite Page.

A tree whose fruit is as large or larger than ordinary, but which never grows very tall—perhaps ultimately 12 to 15 feet. Space 12 ft. apart.

A dwarfed tree can be sprayed, pruned and picked by hand without ladders, equipment or professional skill. It bears much earlier in life, in its third or fourth year at latest—often earlier—and carries amazing loads of fruit. Dwarfed fruits (especially Plums and Peach) are less liable to borers and other pests.

## Espaliered Fruits

Ten to twelve feet is the maximum height to which true dwarf Espaliers will grow. Little pruning is needed—beyond keeping the small new spurs from reaching more than six inches outside of the main stems. When a spur has borne it will continue to bear. Pick the stem with the fruit.

In planting against a wall, place the tree six inches away and allow 18 inches root space—requiring a space in all two feet out from the wall.

#### **PLANTING** SMALL SHRUBS

4 Then fill remaining hole with earth, leaving a shallow Cup. Water again. MOST SHRUBS

Bloom young, usually in second year. But after ten years they need 6 feet of space for best appearance. So plant 3 feet apart and arrange that every second shrub can be removed in later years. (Dwarf shrubs take just half this spacing.) Shrubs grow quickly, so small sizes (see Page 50 for some special offers) are practical for mass effects. Most kinds are in the table below and described and priced in following pages.

> Shrubs that take care of themselves are marked in the tables below with a "†". These literally gain no improvement whatever from cultivation — plant 'em and forget 'em! Some are very beautiful indeed.

**PRUNING SHRUBS**—Flowers come on old wood, so the rule is to prune when in bloom or just afterward. Thus no potential bloom is lost. Natural shrub shape is to have many main stems in a clump all ascending from the ground, so prune out old branches.

#### VINCA (The Myrtle)

The most satisfactory, showy, trouble-free of all ground covers. The leaf is small, shiny, dark green all year round. Even in full shade, the leaves grow thickly. It spreads by underground roots. To be sure of coverage within (say) 2 years, we recommend spacing 12 in. apart. There are blue flowers, showy and cheerful, all spring. Will grow and thrive in any soil. ### It Pays to Plant Things Small

Nursery stock, unlike any other merchandise, increases in value as it gets older. More precisely, a planting worth \$1000 can be set out two years earlier for \$500, or four years earlier for \$250. Plants just about double in value every two years. Moreover, the labor of planting more than doubles every two years: Three men might take two hours to plant a 20-foot tree; the same tree when 6 feet high can be set out by one man in twenty minutes!

In most trees and shrubs there are three sizes: 1. Babies that have to be nursed. 2. Transplanted young plants that need only a year of ordinary growth. 3. Landscape sizes, already shaped and filled out. For most gardeners, the second size is the most fun and the most economical.

Never buy the wrong thing because a young plant of it looks nice—or is cheap—because plants grow up and when mature they may not look nice nor be suitable and must be thrown away. Whatever you spent is wasted. If you cannot afford large, of the right kind, then buy small.

### Start A HOME NURSERY

Wise old gardeners, you will notice, always have a few rows of trees and shrubs growing for future plantings. They do not depend upon buying everything as they need it. Now that we are coming out of the age of jazz and impatience we should remember the quiet wisdom of older days. Do not wait until you need trees—large ones and in a hurry—but look over your grounds and plant now what you may need 3, 5 or even 10 years hence.

- 1. Save money and labor
- 2. Save disappointments
- 3. Save delays
- 4. Increase your enjoyment
- 5. Rare and interesting
- 6. Culture not difficult

#### Soil Preparation

The lath-house soil should be sandy loam with an original dressing of 3 inches of manure worked on to a spade depth. The nursery itself can be heavier soil, but requires manure as well. Avoid lime.

Heel-in Area. Even a tiny spot kept free for this purpose, enables one to temporarily plant a shipment of plants the day received. They can safely remain for weeks if need be before permanent planting. Water well.

#### **Grades of Stock and Treatment**

-See also page 8-

Older plants just grow, if soil and climate are normal. Young plants need care—chiefly shade, extra water, wind protection. These are the grades as handled and sold in nurseries:—

A—Seedlings or Rooted Cuttings Must be shaded first two years. Planted 2 in. x 2 in., lath-house holds 432. After two years, must be transplanted into next grade.

#### **B**—Once Transplanted Grade

Grown as above, or bought. (Our 2 yr. and 3 yr. Azaleas, or the 2 inch bands next page). Space about 5 in. x 5 in. (80 in the lath-house pictured). Shaded first year, but the second year shade omitted except in drought. In 2 years, now twice transplanted ("XX"), usable as hedge plants, for bedding, etc.

#### C-Twice Transplanted Grade

Can be moved into open, spaced 9 in. x 9 in. (nursery pictured holds 104) and left two years. They are "shaped"; straggly branches lopped off with sharp knife. Cultivate, fertilize, water, no shade needed. After 2 years, they are XXX (three times transplanted), bushy and shapely.

#### **D**—Specimens

Every garden needs some larger, well formed plants. Such specimens are grown 2 or more years spaced 18 in. x 18 in. (nursery pictured holds 32.)

that will in a few years, with little care, be \$25 specimens.

Do not wait until you need large trees in a hurry, but look ahead 5 or even 10 years hence.

The plan shows a corner of a lot using a 9 by 12 foot area for a nursery—no more space than used by a small specimen tree. The shrubbery masks the area. Exposure is planned as if north were at the top—but any exposure would do, locating the Lath Screen in shady spot.

Lath Screen sketched below is very important for young plants the first summer. Simply built of ordinary lath and a few nails. Screen is rested on the posts.

spacing evergreens. Generally speaking, plants from 12 to 36 inches should be spaced 3 feet apart and rearranged at the end of 5 to 10 years.

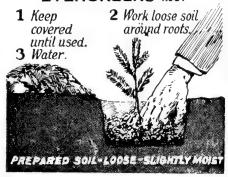

PLANTING WITH A BALL

Pack Toose soil around Ball Tramp firmly. Cut Burlap and push it down. Leave it to decay.

**3** Then water and fill in remaining soil.

#### EVERGREENS PARE

NOTE: Water is needed more by evergreens than by any other plants. Keep moist before and after planting. AN EVERGREEN has leaves all winter, ready to do their work if the day chances to be warm enough. For this reason **extra water** must be given all newly-planted evergreens. Twice a week for a month. Evergreen roots contain resinous sap which hardens after exposure to the air for no longer than two or three minutes.

This is ample time to plant and firm a small evergreen, but larger evergreens are shipped with a ball of earth, with no timing limit.

#### Special Hemlock Offer

Hemlocks naturally make compact root systems if grown in soft humus. We have collecting rights on an area in North Carolina where they grow in this manner and can dig nice shapely young plants with a ball of earth (B&B) that will give satisfaction and grow into fine specimens. Express runs about 15 cents a plant, paid on arrival. Two kinds.

# TREES GROW QUICKLY—Since a young tree requires little care, and is much less expensive and trouble to plant than a large one, it pays to plan ahead. Among "slow" trees these reached 30 feet in 15 years: Red Oak, Pin Oak, most Maples, Liriodendron, several Birches, Black Locust and American Linden.

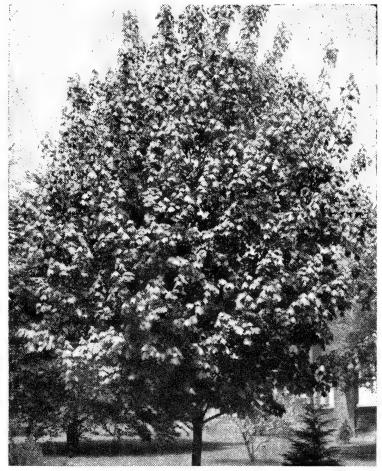

# DECIDUOUS TREES

On the next 8 pages is an alphabetical list of deciduous trees. Many sorts not listed can be quoted on request. Small, bushy trees are included in this list, though some of them come close to being shrubs (there is no clear dividing line). We try to simplify, e.g., all Maples, even dwarf forms, are here.

PERENNIALS

PAGES 58 TO 63

On these six pages is packed more information and variety than in many a large perennial catalog. Strong, sturdy field-grown clumps are offered, except for kinds that do best in pots. Perennials are not shipped until late April and May as a rule, but OR-DER NOW. We'll ship at the right time. Add 50c handling on perennial orders under \$5.00, otherwise all prices postpaid East of the Rockies.

PERENNIALS last for years in the ground. One plant in New England has been recorded at four generations.

HARDINESS is sufficient to grow most kinds up to Zone IV. Extra hardy sorts include: Aquilegia, Campanulas, Dianthus, Delphinium, Hemerocallis, Iris, Lilium, Peony, Phlox.

ROOT CLUMPS. Most perennials come as sketched above. Work the loose earth well in among the roots; spread roots gently to allow this. Water well to settle. If growth has started, shade from direct sun first few days.

# Wild Flowers

Success with wild flowers is simply a matter of putting them in the soil, exposure and general climate to which they are accustomed. It is important to arrange gardens where associated plants are grouped, rather than try to make artifical differences of soil in the same bed. Coddling is apt to do more harm than good.

Lady-Slippers,
Trillium, Bloodroot, Jack-inPulpit, BlueBells, and early
spring bloomers can be
shipped only
in fall.

#### Columbine

#### **Grandiflora Roses**

This class, like Floribundas but with vigor and blooms like Hybrid Teas, is now made to order to fit these favorite Brownell varieties. Bloom all summer

\* Pink Princess. Bud red, flower deep pink. Free from premature defoliation.

Anne Vanderbilt. Exquisite coppery orange, red, informal, semi-double, fragrant.

\* Lafter. Sparkling orange and yellow, semi-double.

Lily Pons. Cream, large. Vigorous, free

Curly Pink. Clusters of large two-toned pink all summer. Vigor, health, and constancy.

\* Dolly Darling. Pink, sunset and rose blend. Extra vigor and health.

#### 4 Brownell Floribundas

Everblooming, hardy, bushy clumps.

★ Pink Bouquet. Vigorous double pink.

Tomkins Red. Semi-double, velvet red.

- \* Orange Ruffels. Glowing, soft luminous. Steady bloomer all summer. Large.
- \* Yellow Ruffels. Similar, but a good nonfading yellow.

#### 3 Brownell Creepers (June)

For ground cover on walls, on fences. Brownell Rambler. A large clear yellow. Bushy.

Apricot Glow. Coppery pink, brilliant. Double flowers.

Golden Glow. The spectrum yellow, very fragrant.

#### 3 Brownell Climbers (June)

Elegance. Very large, perfect blooms. White with shaded yellow center. Grand show.

Golden Climber (Mrs. A. C. James). Best yellow climber. Fragrant, ideal for cutting.

Copper Glow. Deep coppery orange. Delightful spicy fragrance. Sensational color.

# BROWNELL SUB-ZERO GUARANTEED TO BLOOM

# ROSES 3 FOR \$6.25 DOZEN: \$22.00

All prices

The result of two decades of research, this new race of roses adds to unusual hardiness a character of improving with age, rather than slowly deteriorating as most hybrid teas do. They are exceptionally easy to grow and bring into bloom. Disease-resistant, unusually hardy.

HARDINESS: About Zone IV, but roots will survive still colder climates. Even if tops damaged, new growth will be ready to bloom by rose time.

#### **EVERBLOOMING PILLAR ROSES**

This new race is really revolutionary. A combination of HT's and ordinary climbers never before obtained. Beautiful large HT blooms all summer. Sub-zero hardiness. Bloom at ends of all stems the same year they grow. Red, pink, apricot, yellow, white in various shades. Not yet named, sold only our selection of colors (one each color) 3 for \$10. 6 for \$20. If only one desired, price is \$4 each.

They grow sturdy like climbers, but not so high. May be kept cut back as giant bush form Hybrid Teas, or as specimen selfsupported bushes 5 to 8 feet tall —something that only tropical gardens hitherto have been able to show.

#### **Brownell Hybrid Teas**

Shades of Autumn. Red and yellow.

Tip Toes. Spicy fragrance. Orange and pink blend. New.

Dick Wilcox. Deep red, magnificent vigor and size. New.

V for Victory. Large, double, yellow, fragrant, profuse.

Country Doctor. Large, recurved silvery pink satin.

Sun Up. Rich, clear china-rose.

Cedric Adams. Scarlet and crimson, large and double.

★ Red Duchess. Robust sturdy large red. Outstanding fragrance. Brilliant, free to flower.

Queen o' the Lakes. Sensational large crimson. New.

Everblooming pillars can be grown as climbers, or as large bushes.

#### ★ No More Black Spot!

Absolute resistance to this dread disease has been bred into seven of these roses:

**Pink Bouquet** Yellow Ruffels Dolly Darling Red Duchess Pink Princess Orange Ruffels Lafter
